

Meeting Minutes

Title: Internship Day-15

Attendees:

Futureense Technologies – Akash Das
Jain University – AI and DE

Objective:

- To adopt the optimal practices between using join and subquery that are appropriate for a specific situation.
- Run queries to comprehend the various situations where joins and subqueries are favored.

Agenda:

- Comprehend the processing of a query.
- Execute and scrutinize the function of subqueries in an execution plan.

Key Takeaways:

- Gaining a deeper comprehension of the execution process of SELECT statements.
- Employing subqueries is a more effective method for data retrieval without adding complexity to the query.
- Efficient use of joins and subqueries.
