

Meeting Minutes

Title: Internship Day-6

Attendees:

Futureense Technologies - Akash Das
Jain University – AI and DE

Objective:

- Learned to establish a link between a local development environment like VS Code and a remote version control system such as GitHub using terminal commands. Also, gained an understanding of the basics of crafting simple SQL queries for interacting with databases.

Agenda:

- Establishing a connection between a GitHub Repository and VS Code using the Terminal.
- Performing SQL Queries on Databases.
- Delving into Introductory Practice Materials.
- Participating in three mini projects dedicated to SQL exploration.

Key Takeaways:

- **Git & VS Code:** Explored linking GitHub repositories with VS Code through terminal commands, improving version control methodologies.
- **SQL Querying:** Became acquainted with formulating elementary SQL queries to interact with databases, encompassing actions like selecting, filtering, and sorting data.
- **Task Assignment:** Assigned to upload the created SQL file to our GitHub repository for collaborative access and administration.
- Delved into and accomplished three mini projects designed to bolster SQL exploration abilities.
